

General Services Administration Alliant Government-wide Acquisition Contract (GWAC)

Scope of GWAC: Includes any and all components of an integrated information technology (IT) solution, including all current and any new technologies which may emerge during the life cycle of the contract and IT systems and services in support of National Security Systems. The contract provides IT solutions through performance of a broad range of services which may include the integration of various technologies critical to the services being acquired.

Benefits of Using the Alliant GWAC:

- | **Speed and Cost - save time and money.** The contracts are already fully competed – projects become task orders issued against an existing GWAC contract. Procurement lead time is drastically reduced compared to conventional contracting methods.
- | **Limited Protestability –** Protests are not allowed on task orders under \$10 million except on the grounds that the order increases the scope, period of performance or maximum value of the GWAC.
- | **Supports various task order contract types:**
 - Fixed Price (FPI, FPAF)
 - Cost (CPFF, CPIF, CPAF)
 - Time & Material and Labor Hour
- | **Allows for ancillary support to offer an integrated IT solution**
- | **Ability to support regional and global IT requirements**
- | **For use by federal and Department of Defense agencies with a delegation of procurement authority**

THE CENTECH GROUP, Inc. (CENTECH®) has been selected as a premier industry partner under the Alliant contract and has undergone a stringent process for inclusion on this ten (10) year, \$50 billion ceiling Indefinite Delivery, Indefinite Quantity (IDIQ).

As an Alliant prime, CENTECH provides innovative technology solutions and expertise on federal agency requirements for worldwide services under the North American Industry Classification System (NAICS) Code 541512: Computer Systems Design Services. Our technology solutions are provided through the performance of a broad range of services including providing the management, supervision, labor, facilities and materials necessary for the integration of various technologies.
